

▶ Data management. Done differently.

Enterprises are struggling to manage significant data challenges. There is a rapidly growing volume of data, pressure to perform rapid recovery of data in the event of a cyberattack or natural disaster, and the execution of day-to-day service delivery requests from the enterprise.

It's a world where data volume is exploding. At the same time, organizations rely even more on data to drive the business. Customer service, patient care and financial decisions all rely on data – accessible data – for the best decisions and competitive advantage.

Today data management needs to be aligned with the daily infrastructure and operations strategy for every business. A modern, smart IT data strategy that supports business goals helps your entire organization be more successful.

DATA MANAGEMENT AS A CRITICAL BUSINESS FUNCTION

It's time to think differently about data and data management. Commvault enables progressive enterprises to rethink data management across the organization. With Commvault, you have the advantage of a single, converged data management solution that brings a simple, smart approach to hybrid IT.

Now you can know, move, manage, recover and use your organization's most critical asset — your data — in exciting new ways. With a flexible, yet comprehensive data management platform, you can quickly deliver actionable insights from data stored across your IT infrastructure.

Empowering progressive enterprises to redefine backup and recovery, Commvault helps to reduce your risk profile while improving your service delivery. Only Commvault gives you the advantage to protect, manage and access a broad range of data types across primary infrastructure, cloud and secondary storage locations.

With Commvault you can quickly test a new customer application, support a new overseas office, and have the confidence to protect your organization from a ransomware attack.

“Data is the heart of our business operations. It is critical in our mission to provide clients with high-quality services and commitment to their long-term success,”
