PUBLIC CLOUD SERVICES

COOLSPIRiT™
a Databarracks company

Elevating operations with scalable architecture and engineering. Meticulously designed to secure, optimise and support cloud workloads through automation and AI driven services. Enterprise-class continuity, security and resilience. Accessible for all.

COOLSPIRIT
a Databarracks company

PUBLIC CLOUD JOURNEY

PHASE 1
Architecture and Design

Architecture that prioritises scalability, resilience and security to ensure your operations are robust and adaptable. Streamlined provisioning, management processes and governance through seamless integration of Infrastructure as Code (IaC).

PHASE 2
Cloud Governance Framework

Get your applications ready for the cloud.
We advise your applications team on how to Rehost, Refactor, Revise, Rebuild or Replace. Then we move you there.

PHASE 3
Business Intelligence

Leverage Business Intelligence to measure and centralise Cloud Governance Framework metrics. Enhance operational efficiency, reduce costs, ensure security and compliance and support strategic decision-making.

PHASE 4
Optimisation

Efficiently finetune your cloud deployments to strike the perfect balance between cost-effectiveness, robust security and scalable infrastructure.

PHASE 5
Training and Enablement

Customised workshops and training programs to empower your teams with the knowledge and skills to effectively leverage cloud technologies. Supplemented by comprehensive documentation for independent

SERVICES

DevOps

Optimise and streamline your software development and deployment workflows. Round-the-clock monitoring and support services ensure consistent peak performance of your cloud infrastructure.
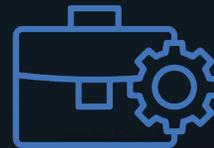

Through our collaborative approach, we empower your team with the knowledge and expertise to navigate and excel in the ever evolving cloud landscape. Together, we ensure your organisation remains agile, adaptable and fully equipped to leverage the full potential of cloud solutions for sustainable growth and success.

SecOps

Comprehensive security assessments to identify and mitigate potential vulnerabilities and risks within your cloud environments. Continuous security monitoring solutions, enabling real-time detection and response to emerging threats.

Leveraging advanced security tools and analytics, we offer unparalleled visibility into your cloud environment's security posture.

SERVICES

FinOps

Maximise efficiency and minimise expenses. Our transformative approach to cloud financial management — fostering collaboration among engineering, finance, technology and business teams — helps to optimise cloud spending and maximise business value.

FinOps creates a strategic framework between Finance and DevOps to provide clear insights into what you have, where it is, and what it's doing to commercially govern digital transformation.
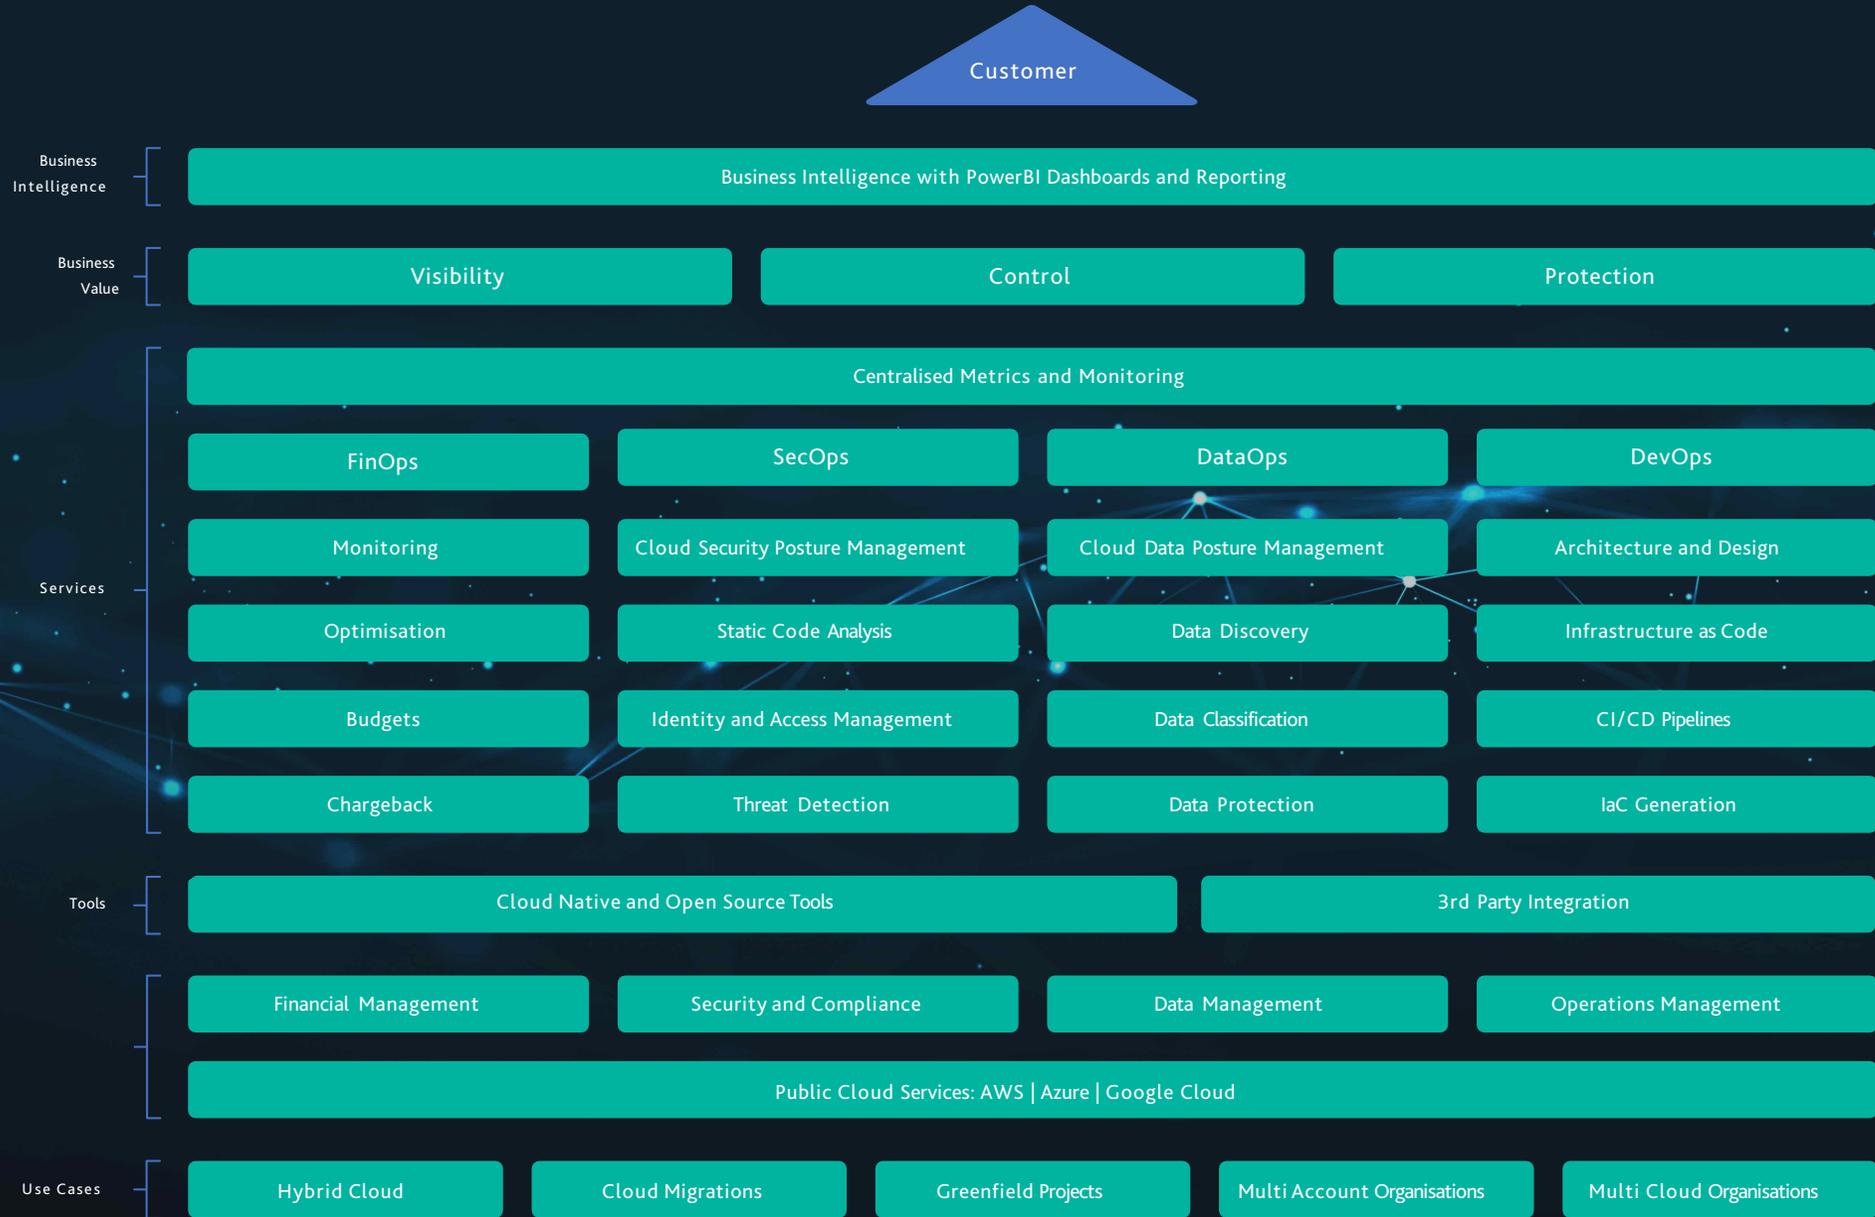

DataOps

A comprehensive suite of services encompassing proactive monitoring, incident management and performance optimisation to guarantee the reliability and availability of your cloud services.

Data Classification and Cloud Data Posture Management solutions ensure the security and seamless operations of your critical data, while also safeguarding sensitive information.

Public Cloud Services: AWS | Azure | Google Cloud

Use Cases

| Hybrid Cloud | Cloud Migrations | Greenfield Projects | Multi Account Organisations | Multi Cloud Organisations |

CUSTOMERS

"Databarracks have integrated incredibly smoothly with the way we use AWS. They help us get the most out of the platform without sacrificing the technical coverage we'd be getting with a conventional physical hosting provider."

Oliver Davies,
Head of Digital, UKTV

"Databarracks understands our organisation's needs. Accordingly, their team create a tailored solution to manage ongoing pipeline of work. Having the Databarracks team's experience in leading projects is invaluable."

Duncan Wood,
ICS for Department for Science Innovation & Technology and Department for Energy Security & Net Zero
